Bandung, Indonesia • +62 812 8080 1256 • clarissexk@gmail.com
clarisse-x.github.io • linkedin.com/in/clarisse-kurniaman • github.com/Clarisse-X

Computer Science student at BINUS University working across software engineering and applied machine learning research. Co-author of a peer-reviewed ML paper on clinical risk stratification (ICCSCI 2026), with full-stack development experience (PHP, Laravel, JavaScript, MySQL) and a working foundation in UI/UX design.

TECHNICAL SKILLS

Languages: JavaScript, PHP, Python, SQL, HTML/CSS

Frameworks & Tools: Laravel, Flask, Bootstrap, Tailwind CSS, MySQL, Pandas, NumPy, Seaborn, Scikit-Learn, Figma, Git/GitHub, Google Colab

EDUCATION

BINUS University | Bandung, West Java
B.S. in Computer Science

Expected 2028

Relevant Coursework: Data Structures, Algorithms, Web Development, Machine Learning Fundamentals

Activities: Active Member, Bina Nusantara Computer Club (BNCC)

PUBLICATIONS

Cost-Sensitive Ordinal Classification for Meningitis Risk Stratification

June 2026

11th International Conference on Computer Science and Computational Intelligence (ICCSICI) | Co-Author (3-person team)

- Researched and wrote the introduction, co-wrote the methodology, and interpreted SHAP outputs to explain biomarker influence across risk tiers, comparing baseline models against cost-sensitive ensembles (Random Forest, LightGBM, XGBoost).
- The resulting cost-sensitive Random Forest model reached a 0.834 weighted score and a 0.821 Matthews Correlation Coefficient, reducing high-risk false negatives.

PROJECT EXPERIENCE

Full Stack Developer | Web Application Development

Jun 2024 – Jun 2026

- Built custom full-stack web applications, including an e-commerce platform and a bookstore management system, with product catalog search, shopping cart, and dynamic receipt/payment processing.
- Designed front-end interfaces and back-end architecture, integrating databases and RESTful API logic; implemented authentication, state management, and cart operations across PHP/Laravel and Go services.

Co-Author | Web-Based CDSS for Meningitis Risk Stratification

Feb – Jun 2026

- Co-authored a peer-reviewed paper on a web-based Clinical Decision Support System that helps clinicians triage meningitis risk, pairing a Flask backend and a cost-sensitive Random Forest model with the Google Gemini API for clinical summaries.
- Led the investigation and formal analysis phases, evaluating single-patient and bulk workflows (up to 500 records) and validating that an asymmetric penalty matrix minimized high-risk false negatives.

Research & Narrative Lead | Arisanku — EEA 2026 UI/UX Competition

Aug – Sep 2026

- Defined problem statements, personas, empathy maps, and Jobs-to-be-Done frameworks, and authored the design proposal and presentation script for a digital arisan concept addressing trust and transparency in community savings.
- Shaped the overall UX strategy and analyzed user feedback alongside teammates, who led the visual UI design and usability testing sessions.

- Data Science Developer** | Heart Disease Exploratory Data Analysis — GDGoC BINUS Bandung Workshop *Feb 2026*
- Processed and analyzed a clinical dataset in Python to identify key correlation factors in heart disease diagnosis.
 - Conducted Shapiro-Wilk normality testing and Pearson/Spearman correlation analysis, building Seaborn visualizations to extract actionable clinical insights.

WORK EXPERIENCE

- Private Tutor** | Bandung, West Java *Jul 2024 – Present*
- Conduct 1-on-1 tutoring for approximately 10 students, focusing on critical thinking, structured problem-solving, and academic writing.

- Independent Peer Mentor – Computer Science** | BINUS University *Jan 2026 – Jun 2026*
- Independently mentored BINUS juniors in computer science fundamentals, running approximately 9–10 one-on-one sessions across 4 actively engaged students.
